GREEN PATHS TO ECONOMIC RECOVERY

Discover » Policy Innovation » Learn » New Technology » Get Inspired » Best Practices » Share

Home to the world's eighth-largest economy, the Golden State has an unmatched combination of forward-thinking green policy, technological innovation, natural resources, and public commitment to sustainability.

Come to the Summit to discover the many ways that the public and private sector are working together to harness these resources and create a green path to a prosperous future.

Get briefed on new regulations, including the new mandatory green building code, CALGreen, and energy monitoring requirements for commercial buildings. Find out about the latest incentive programs for energy efficiency, renewable energy, green job development and more.

Keynotes and Exposition are Free to Registered Attendees!

General session speakers include Sacramento Mayor Kevin Johnson and Elton B. Sherwin, Jr., author of "Addicted to Energy – A Venture Capitalist's Perspective on How to Save our Economy and Our Climate."

Exposition

Discover hundreds of green products and services all in one place. Talk to experts and get intensive, hands-on education that's not available anywhere else!

Education Program

Expand your knowledge and skills through a comprehensive program of classes and seminars addressing a wide range of critical issues, ranging from energy efficiency, green economic development and alternative vehicles to water management, renewable energy and green building.

Exhibit!

Bring your green product or service to the attention of green leaders from government and the private sector. Participate in the Summit's unique Buyer/Vendor Lounge, where you can schedule meetings with purchasers interested in your product category.
